

Think of this as a way to strategically choose a job that will help you pay for your degree or credential - with support from OneGoal and Guild along your journey

What do I do? How do I get started?

1. Check out the Guild website: nextchapter.guildeducation.com/getstarted/

- Explore the details of each company's tuition benefits - when would you become eligible? How much funding is offered? Where can you use the tuition benefits (degrees/credentials)?
- Consider: Do the credential/degree partners meet your interests? Will the tuition benefit help you afford to enroll?
- Look to see what jobs are open

2. Apply for a job

- If you see a job that fits your interests and skills, the Guild platform links to the company's website to apply
- Apply and engage in the hiring process

3. If you accept a job with a Guild employer partner, start your job

- Once you're eligible for your employer's tuition benefits, *create an account with Guild*. This will give you access to a Guild coach
- *Already working for a Guild employer? *Create an account with Guild now!*

4. Apply for a degree/credential while working

- *Lean on support from OneGoal and Guild*. OneGoal will be here to check in with and support you AND once you get hired by your employer you'll have access to a Guild coach who can talk through how the tuition benefit works and what you need to do to apply for the program of your choice

5. Start your degree/credential while working

- *Lean on support from OneGoal and Guild*. OneGoal will be here through your first year out of high school AND you'll have access to a Guild coach who can answer questions about your academic program and help with time management strategies until you complete your program.
